NATION BUILDING IN CANADA

Universities to Follow the Railroad in Binding East and West Together For the Cause of National Unity

Hand in hand with the material growth of Canada, with the extension of her population, and the development of her natural resources, moves forward the current of her intellectual and spiritual life. The race of men and women whose adventurous spirit and indomitable courage are making the nation what it is, the kind that are the merely material of Canada's pioneer while ago were young men who saw visions, and old men who dreamed dreams, and their sons and daughters are no less gifted. Their broadening horizon now includes a new world of mental and spiritual effort in which they

in turn, must be pioneers. The realization of this fact has become a living force in the fine universities that are already doing a great work at Winnipeg, Edmonton, and Saskatoon and Vancouver.

In the making of the Canadian nation...

an thought move east as do those of trade. This is the thought that lies behind the recent donation by the three annual of the \$500 University for being grad-

provincial institutions. Through these scholarships a constant stream of the brightest and most ambitious of western university students will be enabled to spend some time in Eastern Canada and thus become familiar with methods of life and thought

Bentley, President of the Canadian Pacific Railway, in his letter to Sir Robert Falconer, President of Toronto University, announcing the granting of the three scholarships. "The movement is one that will obviously be of benefit, not only to the students, but also to the communities in which they will afterwards live"

A SHREWD YOUTH

The teacher had been explaining fractions to her class. When she had discussed the subject at length, wishing to discover how much the lesson had gone home to the brains of her students, she inquired: "Now, Edgar which would you rather have, one apple or two halves?" The little boy promptly replied, "Two halves!" "Oh Edgar," exclaimed the young woman, a little disappointedly, "why would you prefer two halves?" "Because then I could see if it was bad inside."

The guest hurried up to the hotel clerk's counter. He had just ten minutes to pay his bill, reach the station and board his train.

"Hang it," he exclaimed, "I've forgotten something. Here, boy, run up to my room—number 427—and see if I left my pyjamas and shaving kit. I've only five minutes now!" The boy hurried. In four minutes he returned breathless, "You left

"A" B... and to be the first... ed in England... 16000 on behalf of... sum at Sothaby's sale... book, so small that it could easily slipped in the pocket, was printed 1823 by one Richarda Pynson. It was written by Sir Anthony Fitzherbert, of Norbury, Derbyshire, and is in excellent condition, though colored with age. It is bound in morocco.

SELF CONTROL

Sandy MacKay was anxious to take his wife for an aeroplane trip.

After much hesitating he agreed to pay the aviator a \$5 fee, and, in addition, 25c for every exclamation or word uttered during the flight.

Having gone up a few thousand feet the airman indulged in a number of hair-raising stunts, finishing up by looping the loop seven times, but, try as he would, he could not make the Scotsman utter one syllable.

When they reached earth again he congratulated Sandy on his self-control.

"Why, mon," was the reply, "It was not so great a test, but it nearly cost me a quarter when the wife fell out."

A giant aeroplane to carry 24 soldiers has been successfully tested at the Brooklands aerodrome.

The ages between twenty-five and forty seem to pass more quickly than any other period of life.

Poultry feathers weighing 4,000 tons and valued at over half a million, were imported into Great Britain in twelve months.

What this old world needs is more plough shares and less of the oil kind.

UNEXPECTED DISCOVERY

A Scotch laborer was slipping out of the yard during working hours when he met the foreman. "Hallo!" said the latter pleasantly, "were you looking for me?" "Ay," replied Sandy, "I wis lookin' for ye, but I didn't want tae find yae."

Barbers are smart men and know all the values of flattery. That is why they ask a smooth-faced youth if he wants a shave, and a bald-headed man if he wants a haircut.

First Player: "I don't like to get billiard chalk on my clothes."

Second Player: "That can't do much damage."

Can't it? It looks too much like face powder."

CITY DRUGGISTS RELIEVED
OF THE SALE OF LIQUOR

Druggists in the four cities of Edmonton, Calgary, Lethbridge, and Medicine Hat, are to be relieved shortly of the responsibility of the sale of alcoholic stimulants, according to an announcement by Attorney-General Brownlee. The sale of liquor in these cities will henceforth be conducted solely by government vendors. This will necessitate the appointment of vendors in Lethbridge and Medicine Hat. In Towns and outlying points druggists will continue to dispense liquor on prescriptions, but the quantities will be reduced to six ounces in bottles sealed and supplied by the government.

DO YOU KNOW THAT

The federal constituency of Battle River is two hundred miles long from north to south?

That it is sixty miles broad from east to west?

That it is the second largest in the province of Alberta?

That it contains 95 per cent rural voters?

That while it lays north and south, all railroads therein run east and west—thus making the constituency one of the most difficult to organize?

OPENING OF HOUSE POSTPONED

The opening of the Legislature, which was billed to take place on December 7th, will not now be held until January 23rd, owing to the fact that Premier Greenfield will be engaged in the conference on natural resources at Ottawa for the last two weeks in November, and that the government is not quite ready with its program for the session. The Premier is anxious to go into the session fully prepared to proceed with legislation. The date of January 23 is ten days earlier than the date of opening last spring.

the pleasure. There is no better way of taking a holiday than by a trip over this road, the enjoyment starts when you do, and you do not have to wait for pleasurable experiences until you reach your destination. The Canadian National Railways owns and operates its own sleeping cars and dining cars. These cars, on through trains, are models of luxury and convenience built by experts and embodying improvements resulting from long years of experience in studying the requirements of first class travel. An additional convenience is provided by tourist car service. Canadian National tourist cars are all new and embody the latest and most modern improvements. Charges are only half those for accommodation in standard sleeping cars. For those bringing lunch and desiring to do their own cooking en route, a kitchen is provided in a compartment shut off from the rest of the car. A fire is kept constantly burning in the cook stove and a sink with taps provides hot and cold running water. The dining cars, with their hand-painted finish, quiet decorative details and adequate arrangements, furnish a meal time environment both useful and pleasing and at reasonable cost. All passengers have access to the Dining Cars.

The Canadian National Railways offers patrons the option of travelling all rail to Vancouver or rail to Prince Rupert, thence Grand Trunk Pacific steamships to either Vancouver or Victoria; or the trip may be made going one way and returning the other.

A greater influx of tourists and excursionists is expected at these North Pacific Coast resorts, as these cities have taken considerable trouble to make the countryside acquainted with the beauties of our coast points as winter resorts.

FARMING IN CHINA

For over 4,000 years Chinese methods have maintained the fertility of the soil. Despite obsolete equipment, China is probably, after the United States, the foremost agricultural nation; intensive cultivation grows several crops on the same plot of land. The farmer generally owns his land, though the average farm is but an acre in extent. No less than 80 per cent of the foreign trade consists of agricultural and allied products.

IMPORTANCE OF THE COMMA

The teacher had been explaining fractions to her class. When she had none was intended, cos the U.S. government approximately two million dollars, a few years ago. A new tariff bill, designed to encourage the cultivation of fruit trees and vines of high quality, provided that "foreign fruit plants, etc." were to be admitted free. But the printer put a comma between "fruit" and "plants" with the result that for a year great quantities of fruit came into the country free.

A DISMAL OUTLOOK

The minister of a Scottish country parish, whose estimate of himself was not of the lowest type, had accepted a call to a wider sphere, and was paying a few farewell visits. "So, ye're goun to leave us," said one of his oldest female parishioners, as he sat down. "What will we dae noo?" "Oh, Mrs MacFarlane," replied the minister in affable tones, "you'll soon get a far better man!" "Deed, sir," came the dependent rejoinder, "I 'ave my doots. We've had five in my time, and every one o' them has been worse than the last!"

RETURNED WITH THANKS

In a remote district the post office was also the local store. A post office official found fault with the way in which the postal business was being conducted, rearing with a lofty air: "You will hear from head office." This was too much for the harassed post master who disappeared for a moment, to return with a wooden box under his arm containing a few stamps and two books. He held out the box at arm's length. "Here," he said, "take your bloomin' post office with you!"

The Literary Editor: "That young fellow Scribner sent in a paper this morning, entitled, 'Why do I live?'" Editor in Chief: "What did you do with it?"

The Literary Editor: "I sent it back with an enclosed slip saying: 'Because you posted this instead of bringing it personally.'"
